

LOGO DESIGN PORTFOLIO

This section contains samples of our LOGO design work LogosFamily Trip

We were approached by a large family that wanted to do something to distinguish themselves from the crowd during a special family cruise. We had Polo shirts embroidered with this simple logo that we designed for the occasion Wen Cosmetics

The client wanted natural colors and the image of the villas namesake - the Majapahit tree. This stylized majapahit tree blended with the ocean waves conveys, if rather literally, the villas identity. The tree and waves make a great watermark for stationary and linens. Oak Tree Technoligies

We developed a full corporate identity for this security technology company. Starting with the corporate logo all the way to promotional posters for their devices and training camps. Spider Partners

Spider Partners is an web development company that wanted a corporate indentity that screamed WEB! The logo concept was the clients, all we had to do was translate it to design. The logo it self is clean, conservative and is indentifiable with the firm. BIA Technologies

BIA is one of our IT company clients. Based in NYC they are the technology side to Oaktree our other logo design above. Their products are market at law enforcement and the shield on the blue data screen is what gives us that feel of protection. The Bali Travel Portal

Echoes of 1930s fruit crates and popular styles of years gone by... This fun logo was an attempt to capture a bright fresh look for a new Bali portal project. The entire site's look and feel is in keeping with the tone set by the logo and identity design. Bali Property Sales

This simple round stamp-type logo was designed for a website that had to promote two brand names: Bali Property Sales.com and Bali Home Sales.com. The client's earthtone theme color scheme figures heavily in the logo design (and on the site as a whole).
